## AMES

### Bacterial Reverse Mutation Assay

#### Assay Points:

- Plate Incorporation Method
- Five Strains Tested per Assay (WP2, TA97a, TA1535, TA98, TA100)
- Five Concentrations per Test Article
- Triplicate Plates per Concentration
- Toxicity Screen (One Strain, 5 Concentrations)
- Validation Performed on 12 Chemicals

#### Validation Summary

Chemical	Strain Metabolic Activation	WP2		TA97a		TA1535		TA98		TA100

\* Cytotoxicity noted. Positive in alternate strain (TA102).

\*\* Being retested at higher concentrations.

**Protocol and Validation Report available upon request.**

Micronucleus and Mouse Lymphoma genotoxicity assays will be available soon.
